

CSC250 Letter of Appeal

At SDSU, CSC250 is expected to be taken as the second core class of computer science, after CSC150. WSU calls this pair of classes "Algorithms and Problem-Solving I and II" whereas SDSU calls them "Computer Science I and II". In this class we looked more in depth at the basics of programming. This course aims to imbue familiarity with computers and programming and acts as a prerequisite for SDSU's Data Structures Course.

Class in Question: SDU:CSC250

Argued Goal: WSU:CS250 CS Major Required Course

Arguments of Appeal:

1. Course Goals Align
2. Both are prerequisites for Data Structures
3. I've already completed Data Structures (and classes beyond that) and remain in good standing
